Summary

Third-year Computer Engineering student with hands-on experience building modern, responsive web applications using **Next.js, React.js, and Tailwind CSS**. Skilled in component-based architecture, API integration, and frontend performance optimization. Passionate about AI products and the startup ecosystem. Solved **200+** DSA problems with national-level hackathon recognition.

Technical Skills

Frontend: React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, React Query, Zustand
UI/UX & Performance: Responsive Design, SSR, SSG, SEO Optimization, Web Accessibility, Component-Based Architecture
Backend: Node.js, Express.js, Django, FastAPI, REST APIs, WebSockets, Socket.IO, JWT Authentication
Databases: MongoDB, MySQL
Cloud & DevOps: AWS EC2, AWS S3, AWS Lambda, Docker, Git, GitHub, Postman, Vercel
AI/ML: YOLOv8, OpenCV, Machine Learning, Deep Learning, Computer Vision
Languages: Python, JavaScript, C++, Java, SQL, C

Experience

Software Developer Intern

NTS Nihon Global

June 2025 – July 2025

Remote

- Built and shipped **responsive UI modules** using React.js and Next.js with reusable component architecture, improving maintainability and development velocity.
- Integrated frontend components with **RESTful APIs** using JWT-based authentication, ensuring secure and reliable client-server data flow.
- Collaborated in an **Agile/Scrum environment** using Git and GitHub, contributing to sprint execution, code reviews, and release stability.

Projects

LinkLoom – Real-Time Communication Platform | *Next.js, React.js, WebSockets, JWT, React Query, Zustand, Tailwind CSS* GitHub

- Built a full-stack **messaging and video communication platform** with responsive UI, event-driven updates, and low-latency user interactions.
- Implemented **responsive client-state management** using React Query and Zustand, and accessible UI components with Tailwind CSS for seamless multi-device experience.

Crowdsourced Civic Issue Reporting System | *Next.js, React.js, Tailwind CSS, Leaflet.js, Cloudinary, JWT* GitHub

- Designed and built a **geo-tagged civic complaint platform** with interactive map visualization (Leaflet.js), role-based dashboards, and responsive layouts using Tailwind CSS.
- Integrated frontend components with backend APIs for photo uploads, GPS-based reporting, and real-time issue status tracking.

AI Traffic Management System | *React.js, FastAPI, Socket.IO, YOLOv8, OpenCV* GitHub

- Developed **live monitoring dashboards** in React.js with real-time data feeds via Socket.IO for dynamic lane-level analytics and emergency vehicle controls.
- Integrated computer vision backend APIs into responsive frontend components to display vehicle detection and adaptive signal scheduling data.

Education

Government College of Engineering, Jalgaon

B.Tech in Computer Engineering

2024 – 2027

CGPA: 8.05/10

ICRE, Gargoti

Diploma in Computer Engineering

2021 – 2024

80.81%

Achievements & Certifications

- **1st Place** – National-Level 36-Hour Hackathon; **2nd Prize** – National-Level DSA Competition.
- Solved **200+** DSA problems on LeetCode; won **2nd Prize** in C Programming and Project Competition; secured **1st place in 5+** inter-college coding competitions.
- **NPTEL Elite+Gold** – Machine Learning & Deep Learning; **NPTEL Elite** – Programming in Java; **AWS Academy Cloud Foundations Badge** (2026).
